

Thank you for your interest in Theater of the Sea's Ultimate Dolphin Swim-Wade Program!

What sets this program apart from our regular dolphin swim, aside from it being a private interaction, is the ability to customize your program to include all family members regardless of age or comfort level. Whether you are interested in a deep water swim, a shallow water wade, or a combination of both, we are here to make sure your program exceeds the expectations of everyone in your group. Below you will find a description of our dolphin pools to help you decide which pool fits your family's specific needs.

Once you have decided on a pool, please contact animalcare@theaterofthesea.com so we can move forward with booking your program. We are also interested in hearing about any special requests you may have!

Main Lagoon-available at 4:25

Our main lagoon is a sprawling deep water pool that is home to our most athletic dolphins making it the ultimate choice for those interested in a swim program. The highlight of your swim will be exhilarating rides like dorsal tows and foot pushes and the once in a lifetime experience of swimming and/or snorkeling alongside the dolphins. Guests enter and exit the pool using a ladder. Participants remain in the water holding on to the float and take turns swimming out into the middle of the lagoon to interact with the dolphin. This pool is ideal for groups that are comfortable in deep water.

Pool 1-available at 10:45, 1:15, 4:25

Pool 1 has a shallow beach area with a wall that separates it from the deep water making it perfect for groups that have both swimmers and non-swimmers. Non-swimmers can interact with the dolphins from the shallow area, while swimmers can interact in the deep area all while remaining in the water together. Guests enter and exit the water via a sloping beach making it the ideal choice for those with physical disabilities.

Pool 2-available at 10:45, 1:15, and 4:25

Pool 2 also offers the unique opportunity to conduct a combination of a shallow and deep water program in the same location. This pool has a shallow sloping beach with a wall that separates it from the deep water. This beach is more extensive than Pool 1 making it more ideal for larger groups.

Pool 3- available at 10:45, 1:15, and 4:25

This pool is home to our female dolphins. It has an intimate shallow beach that is perfect for those interested in a shallow water wade program. The pool also has a deep water area that we can move to if you have a few swimmers in your group that would like to do the dorsal tow and swim next to the dolphins.

Pool 4- available at 10:45, 1:15, and 4:25

This pool is for those seeking privacy, it is tucked away at the end of our park surrounded by native red mangroves. We have the ability to do both deep and shallow water programs in this area. For deep water programs, guests remain on stairs and take turns swimming out into the deep water to interact with the dolphins. This pool also has a large sloping beach that is perfect for shallow water wade programs. If you have swimmers and non-swimmers in your group and prefer this pool due to its privacy we can do most behaviors together at the beach and then move to the deep water area of the pool for the swimmers to enjoy dorsal tows and swimming next to the dolphin.
